

Retain-Max helps turf managers achieve better moisture performance in soils via hand watering and syringing.

Retain-Max is especially effective in the management of localized dry spots caused by:

HEAT STRESS

EXCESSIVE LEACHING

HYDROPHOBIC SOIL

WIND DESSICATION

PROFESSIONAL USE GUIDELINES

APPLICATION:

Retain-Max pellets will fit most hose-end applicator devices. Place **Retain-Max** pellet in hose-end application device prior to hand watering localized dry spots. Thoroughly drench problem area for wetting and moisture retention.

RATE OF APPLICATION:

Retain-Max pellets will dissolve at different rates depending on water pressure, chemistry, temperature, and flow rate. Normally, the pellets will dissolve after 30-60 minutes when used at 60-90 psi (4-6 bars).

COMPATIBILITY:

Retain-Max pellets are not intended to be combined with any other product.

Net Weight: 12.0 x 0.5 lb (227 g) pellets

Also available:

Retain-Max Magnum Pellets 2 x 7 lb (3.18 kg) pellets
