TURF ACTION PLAN

ICE DAMAGE

Accelerate Ice Melt and Move Water

“*Environmentally friendly*” way of reducing damage caused by ice

■ Collecting solar energy

EON 75 100% organic granular

- Black particles (80-110 SGN) absorb sunlight to greatly accelerate ice melt.
- No odor and easy to spread.
- No residual fertilizer for unwanted growth.
- Slow release of the highest concentration (75%) of soluble humic acid available.
- Can be applied over ice or snow.
- Use on any areas where ice melt is desired.

* Standard rate is 1-2 lbs. per 1000 sq. ft.
Higher rates can be used to accelerate ice melting.
